PROFESSIONAL SUMMARY

Results-driven Software Developer with hands-on experience in full-stack development, machine learning, and cloud technologies. Proficient in Python, JavaScript, and modern web frameworks with expertise in object-oriented programming, REST APIs, and database management. Demonstrated ability to collaborate in agile environments, conduct code reviews, and deliver robust software solutions. Strong problem-solving and analytical skills with experience in version control systems and continuous integration practices.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, HTML, CSS, SQL

Frameworks and Libraries: Tkinter, React, Machine Learning Libraries, Random Forest

Databases: SQL, NoSQL, MongoDB, PostgreSQL

Cloud Technologies: AWS EC2, Google Cloud Platform

Development Tools: Visual Studio Code, Git, PuTTY, REST APIs, JSON, SSH

Software Engineering: Object-Oriented Programming, Unit Testing, Code Reviews, Debugging, Agile Methodology, CI/CD

Languages: English, Hindi, Kannada, Telugu

PROFESSIONAL EXPERIENCE

Python Developer Intern

QSpiders

Present | Bengaluru

- Developing NextHire, a Smart Placement & Recruitment Platform using Python, Django, React.js, and SQLite
- Implementing role-based modules for Admin, Student, and Recruiter workflows
- Building features including job posting, application tracking, and dashboard management
- Optimizing backend logic and database operations to improve application performance

Junior Cloud Assistant Intern

Jain Infotech

May 2024 - June 2024 | Bengaluru

- Deployed and managed web applications on AWS EC2 instances across Windows and Linux environments, ensuring optimal performance and security
- Implemented continuous integration and continuous deployment practices using AWS services, PuTTY, and SSH key management for secure deployment workflows
- Collaborated with technical teams to understand project requirements and deliver cloud-based solutions within specified timelines and budgets
- Provided technical assistance and documentation to junior developers, contributing to knowledge sharing sessions and best practices adoption
- Performed system troubleshooting, optimization, and security configuration for production environments

TECHNICAL PROJECTS

Krishi Sakhi - AI-based Crop Advisory System

Technologies: Python, Machine Learning, Random Forest, GUI Development, Voice Processing

- Developed an AI-powered platform to assist farmers with crop recommendations and disease predictions using Python and machine learning models
- Designed and implemented user-friendly interface with voice input and output features in Kannada to enhance accessibility for rural users
- Implemented classification models using Random Forest and other machine learning algorithms for accurate crop disease identification
- Collaborated in agile development environment, conducting code reviews and unit testing to ensure robust application performance
- Applied object-oriented programming principles and database integration for efficient data management and retrieval

GitHub Finder - Web Application

Technologies: JavaScript, REST APIs, HTML, CSS, JSON, Web Development

- Built responsive web-based tool using JavaScript and REST APIs to fetch and display GitHub user profiles based on search queries
- Integrated JSON data parsing and comprehensive error handling to improve user experience and interface responsiveness
- Applied HTML, CSS, and modern JavaScript frameworks to create visually appealing and functional web platform
- Enhanced project reliability through systematic debugging, testing, and code optimization techniques
- Implemented version control using Git and followed software engineering best practices for maintainable code

Floraverse – Plant Disease Detection & Marketplace Platform

Technologies: Python, Machine Learning, React, Node.js, MongoDB

- Designed and developed an intelligent web platform for plant disease identification and marketplace management
- Implemented machine learning concepts to support disease prediction and recommendation workflows
- Developed responsive user interfaces and integrated backend services for seamless user experience
- Managed database operations and optimized application performance for efficient data handling
- Applied software engineering practices including testing, debugging, and modular development

EDUCATION

Master of Computer Applications (MCA)

Reva University, Bengaluru | Expected 2026

Bachelor of Computer Science

Government First Grade College, Yelankha, Bengaluru | 2024 | CGPA: 9.1

Intermediate in Mathematics, Physics, Chemistry

Narayana Junior College, Visakhapatnam | 2021 | Percentage: 95.6%

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) | 2026

Generative AI in HR - Impact and Application of GEN AI

Coursera | 2025

Applied Generative AI Certification

Infosys Springboard | 2025

CORE COMPETENCIES

Technical Expertise: Object-Oriented Programming, Software Development Life Cycle, Problem Solving, Analytical Thinking, Debugging, Performance Optimization

Professional Skills: Team Collaboration, Agile Methodology, Code Reviews, Unit Testing, Technical Documentation, Communication, Leadership
